# Enock Nyakamba

FullStack Developer | JavaScript Enthusiast | Backend & Frontend  
Expertise | Reactjs | Nodejs | MongoDB | Nextjs | MySQL |  
Nairobi County, Kenya

## Summary

As a Fullstack Developer with over 3 years of experience, I specialize in creating scalable and efficient web applications using modern JavaScript technologies. My expertise spans both backend and frontend development, allowing me to deliver well-rounded, integrated solutions that meet user needs and business goals.

In the backend, I excel in using Node.js and frameworks like Express.js to build robust APIs and server-side architectures. On the frontend, I leverage React.js and Next.js to craft intuitive, responsive, and dynamic user interfaces that enhance user experience. My technical skills are complemented by a passion for problem-solving, clean code practices, and continuous learning.

I've contributed to a wide range of projects across various industries, working both independently and as part of agile teams. Whether it's deploying scalable web services, optimizing application performance, or leading technical discussions, I bring a results-driven mindset to every challenge.

---

## Experience

Simple Formations.KE

Full Stack Developer

January 2025 - Present (1 month)

Nairobi

- Design and develop scalable and efficient web applications using the MERN stack.
- Write and maintain unit and integration tests to ensure application reliability and robustness.
- Implement CI/CD pipelines to streamline development workflows and accelerate deployments.
- Collaborate with cross-functional teams to ensure applications adhere to the highest standards of quality, performance, and security.

- Test, debug, and optimize web applications to deliver seamless user experiences.
- Conduct user research with team members to identify areas for improvement in existing services and opportunities for new feature development.
- Stay current with emerging technologies and frameworks in the MERN ecosystem to integrate innovative solutions into projects.
- Perform additional duties as assigned, contributing to the continuous improvement of team processes and project outcomes.

### Upwork, Fiverr, Direct-Clients

#### FullStack Developer

March 2022 - Present (2 years 11 months)

Nairobi County, Kenya

I have been designing, developing, modifying, and debugging programs.

Maintaining existing applications and designing and delivering new applications.

Working closely with clients to establish specifications and system designs.

Contributed ideas and suggestions in team meetings and delivered updates on deadlines, designs, and enhancements.

Estimated work hours and tracked progress using Scrum methodology.

Created proofs of concept for innovative new solutions.

Writing codes using React, Redux Toolkit, Next js, and Typescript.

### Yashio Kenya

#### Full Stack Engineer

May 2024 - January 2025 (9 months)

Nairobi County, Kenya

Collaborate closely with the Development Project Manager to ensure that all requirements are accurately met and delivered.

Provide realistic time estimates for project timelines, from design through to delivery.

Regularly update stakeholders on project status, addressing any requirements, issues, or changes as they arise.

Lead the team in maintaining high-quality software products by fostering best practices and effective habits.

Assess and review various software products, offering peer reviews and solutions to improve related code.

Follow established development standards to deliver solutions that are timely and within budget.

Define the product life cycle phases, including key activities and milestones.

Participate in project review meetings to provide progress updates and insights.

Coordinate with internal teams to ensure successful implementation of existing processes, including new systems.

Take ownership of strategic decisions to support the successful implementation of key initiatives.

Develop and enhance both frontend and backend codebases using technologies such as Next.js, TypeScript, GraphQL, MongoDB, Prisma, Ant Design, React Query, Zustand, Figma, Jira, Slack, Git, and GitHub.

## TrenchLabs

### FullStack Web Developer

October 2023 - October 2024 (1 year 1 month)

Nairobi County, Kenya

Collaborated with cross-functional teams to deliver dynamic, responsive web applications for e-commerce and SaaS platforms.

Managed database integrations, ensuring data accuracy and efficient querying with MySQL and MongoDB.

Utilized DevOps tools like Docker for containerization and automated CI/CD pipelines to streamline deployment processes.

---

## Education

### Kenyatta University

Bachelor of Science , Biomedical Engineering · (August 2017 - December 2022)

### Code With Mosh

Software Engineering, Website Development · (January 2024 - September 2024)

### Udemy Alumni

Software Engineering · (January 2024 - March 2024)

### Alx Africa

Software Engineering, Frontend Development · (June 2021 - June 2022)
